

Can be rolled all the way from the grower ...

... and directly into the store, where it can be used as a display unit.

## CC Container

### The European flower and pot plant trolley

#### A high-quality flower and pot plant trolley

The CC Container is designed especially (but not exclusively) to carry pot plants and flowers. Today it serves users from Sicily to Northern Norway, as the acknowledged standard within the industry. All the way through the supply chain, the CC Container can be exchanged filled for empty, or vice versa. This reduces the total number of CC Containers needed in the entire supply chain.

The CC Container can carry up to 450 kg evenly distributed on the base and a number of shelves, and it has adjustable shelves to provide you with the maximum carrying capacity. You decide the number of shelves you require, and place them at the spacings needed for your specific products.

#### The perfect in-store display

Since the CC Container is designed as an in-store display, it can carry your plants all the way from the grower and directly into the store. Reloading is expensive and often causes damages to the goods, but with this trolley, your products only need to be loaded once to save you the usual costs and risks of handling. For the perfect display, the shelves can be placed at an angle to draw full attention to your products.

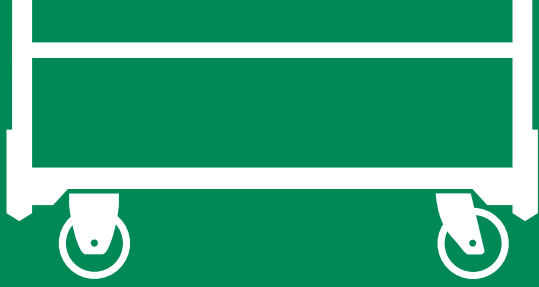

#### Specifications

Size	External		Internal	
Length	1350 mm		1270 mm	
Width	565 mm		545 mm	
Height	1900 mm		1735 mm

Carrying capacity	Total: 450 kg UDL*		Each Shelf: 60 kg UDL*	

\* UDL: Uniformly Distributed Load

Making your products move

## CC Container

### The European flower and pot plant trolley

#### What you get with the CC Container:

- 1 Especially designed for pot plants and flowers** – but not exclusively.
- 2 Can roll your plants from grower and directly into the store.** Products only need to be loaded once, as the CC Container is also a flexible retail display unit.
- 3 Minimised in-store handling.** One person alone can roll it from the backroom and into the store, even without lifting equipment.
- 4 Shelves can be adjusted to your needs.** You decide the number of shelves you require per trolley.
- 5 Ensures a cost-efficient return flow.** For return logistics it condenses to a fraction of its loaded volume.
- 6 Can handle dramatic changes in temperatures.** It can be used or stored from  $-25^{\circ}$  to  $+80^{\circ}$ . The shape and dimensions of the CC Container will remain unchanged.
- 7 Designed to be kept outside.** Made from hot dip galvanised steel to ensure protection from corrosion.
- 8 Can be exchanged all over Europe.** The CC Container forms the acknowledged European standard within flower and pot plant transportation.
- 9 Extended CC depot network ensures you availability** where and when you need CC Containers.
