

A handy transportation unit for the grower ...

... that makes the perfect display unit in the shop.

## CC 1/2 Container

### The 1/2 size flower and pot plant trolley

#### A small but strong flower and pot plant trolley

The CC 1/2 Container has all the advantages of the CC Container, but is only about half the size. However, it has the same strength in construction and almost the same carrying capacity – up to 400 kg evenly distributed on base and shelves. And it has adjustable shelves to provide you with the maximum carrying capacity. All in all, it's a high-quality trolley, designed especially (but not exclusively) to carry pot plants and flowers. It's made from hot dip galvanised steel to ensure protection from corrosion, and it can easily be used or stored at temperatures ranging from -25°C to +80°C.

#### Perfect for medium sized and small store units

The CC 1/2 Container is designed as a retail display, and naturally the small size makes it especially suited for small and medium sized store units. For the perfect display, the shelves can be placed at an angle. The CC 1/2 Container can carry your plants all the way from the grower and directly into the store. The containers only need to be loaded once to save you the usual costs and risks of reloading. And they can be exchanged 1:1 – full for empty or vice versa – all through the supply chain, to reduce the total quantity of items needed.

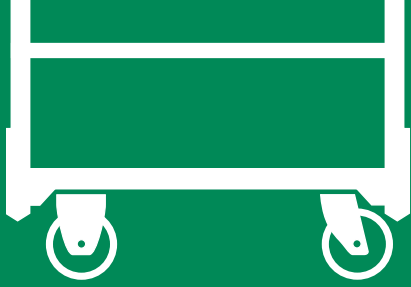

#### Specifications

Size	External		Internal	
Length	715 mm		635 mm

## CC 1/2 Container

### The 1/2 size flower and pot plant trolley

#### What you get with the CC 1/2 Container:

- 1 Designed for pot plants and flowers** – but not only.
- 2 Especially suited for small store units.** The CC 1/2 Container has all the advantages of the larger CC Container, but it is especially suited as a retail display unit for small stores.
- 3 Can roll your plants from grower and directly into the store.** Products only need to be loaded once as the CC 1/2 Container also works as a retail display unit.
- 4 Minimised in-store handling.** One person alone can roll it from the backroom and into the store, even without lifting equipment.
- 5 Shelves can be adjusted to your needs.** You decide the number of shelves you require per trolley.
- 6 Ensures a cost-efficient return flow.** For return logistics it condenses to a fraction of its loaded volume.
- 7 Can handle dramatic changes in temperatures.** It can be used or stored from  $-25^{\circ}$  to  $+80^{\circ}$ . The shape and dimensions of the CC 1/2 Container will remain unchanged.
- 8 Designed to be kept outside.** Made from hot dip galvanised steel to ensure protection from corrosion.
